Section 1 – Project Overview & Scope of Services

1. Project Overview

The Houston Community College System (“HCC” or “College”) is soliciting statements of qualifications from firms with an established history of expertise and qualifications for environmental consulting services in accordance with the terms, conditions, and requirements set forth in this Request for Qualifications (RFQ).

HCC is seeking qualified experienced firms to provide Environmental, Health and Safety Services Consultants for any of a range of environmental consulting services related to existing or future HCC facilities.

The College is responsible for providing timely and efficient professional services in a fiscally sound manner throughout all phases of project development. HCC further strives to insure that each design for a new or renovated facility provides a safe and accessible environment for the public; complies with state and federal codes and regulations; is visually attractive; adheres to the adopted architectural design policies; incorporates durable institutional quality materials and construction techniques; is functionally enduring, energy conserving and economical to construct and maintain. In addition, HCC is dedicated to the ongoing program to improve and expand all physical facilities in support of the teaching, education and service mission of HCC.

HCC request that firms submit technical proposals as defined in this RFQ. After the review process is complete and successful firms are accepted into the “pool”, “on an as needed basis” contract will be issued that encompasses the terms of this RFQ. As Projects are assigned, the scope and cost will be determined on that project specific basis. Cost will be based upon the rates included in the executed “as needed” contract.

By submitting a response, each RESPONDENT certifies that it understands this RFQ and has full knowledge of the scope, nature, quality, and the amount of the work to be performed, the detailed requirements of the services to be provided, and the conditions under which the services are to be performed.

Attendance at this conference is advised if your firm wishes to ask any questions in connection with this RFQ. *Please print a copy of the RFQ and bring it with you, as no additional copies will be provided at the conference.* The College intends to present general information, which may be helpful in the preparation of proposals, and to offer firms the opportunity to ask questions concerning this RFQ.

The pre-submittal conference also provides opportunities for respondents to network and establish SBE and/or subcontracting relationships.

Firms planning to attend the pre-submittal conference should notify Art Lopez by email arturo.lopez@hccs.edu, no later than **3:00 p.m. on December 9, 2019** with the names, titles, and phone numbers of the individuals who will attend.

1.3 Priorities/Expectations

- (a) *Ensuring a Quality Level of Service.* This priority encompasses the quality of the level of service that can be provided to HCC in a timely, cost effective manner. HCC is seeking a RESPONDENT(s) that will ensure the provision of such quality in its delivery of service through proven techniques and established practices.
- (b) *Level of Experience and Expertise.* RESPONDENT(s) must demonstrate its capabilities in providing the utmost level of experience and expertise to ensure a successful project as determined by HCC.
- (c) *Delivery Efficiency.* RESPONDENT(s) must demonstrate its ability to deliver the required services in a timely manner while not sacrificing the quality required by HCC.

1.4 Contract Term

It is anticipated that the contract term for contract(s) awarded resulting from this solicitation, if any, will be over the period of three (3) years with two (2) additional one-year option periods. Further, HCC reserves the right to extend the contract term on a month-to-month basis, not to exceed three (3) months upon the expirations of the initial term and any successive renewal term.

The cumulative total of the fees paid under a contract, including any option years, shall not exceed \$500,000 per Contract year. If the College and successful Respondent(s) are unable to negotiate and sign a Contract, the College reserves the right to seek an alternative Respondent.

1.5 Selection Process

HCC will base its choice on demonstrated competence, knowledge, and qualifications of the RESPONDENT.

The RESPONDENT(S) selected will be the one whose experience and qualifications, as presented in response to this RFQ, establish them, in the opinion of HCC, as well qualified and offering the greatest benefits, experience and value to HCC. HCC may cancel this RFQ or reject proposals at any time prior to an award. HCC is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous to the College.

All submissions must be complete and convey all of the information requested to be considered responsive. If a submission fails to conform to the essential requirements of the RFQ, HCC alone will determine whether the non-conformance is significant enough to consider the submission susceptible to being made acceptable, and therefore a candidate for further consideration, or not susceptible and therefore not considered for award.

HCC reserves the right to accept or reject any or all offers, to waive informalities and technicalities, to accept qualifications considered most advantageous, and/or to make the award to the most responsive respondent.

2.4 Safety Requirements: Occupational Safety & Health Administration (OSHA)

Specific safety environmental requirements on any given project may include but are not limited to:

- a) All work will be conducted in accordance with OSHA and all other applicable federal, state and local regulations. The Contractor will also comply with the HCC Safety Guidelines and Rules.
- b) When working above any area where people might cross below workers, Contractor must neatly and professionally cordon off area(s) using commercially-produced barricade equipment or fencing (e.g. no buckets, wood sawhorses, wood stakes) and post professionally-fabricated signs (e.g. no hand written/stenciled or spray painted signs) for indicating the area(s) is/are closed to pedestrian traffic. Signs must be of sufficient size with specific wording to clearly indicate that work is occurring above.
- c) Barricading should keep pedestrians from entering these closed areas, the Contractor must post an employee to direct pedestrians around the work-area.

does not compromise the security of the work area or the occupants.

2.4.1 Activity Descriptions:

- a.) Activity sheets are for response and recovery workers trained to conduct mold remediation. For some operations or situations, other activity sheets also apply.
- b.) Mold abatement activities might be required after any disaster that results in substantial water damage inside buildings, such as Hurricanes Katrina and Rita (2005). Molds grow rapidly on wet or damp materials after natural disasters that involve flooding or high humidity. Certain molds can cause allergy symptoms in some individuals. Some molds produce toxins, but the effect of these toxins in occupational exposure is still not well defined. As a result, mold remediation could be necessary to return many living and working spaces to a serviceable condition and make them suitable for occupancy.
- c.) Mold remediation response and recovery workers may choose to clean materials that can be dried out, fully cleaned, and reused. The drying and cleaning steps can involve the use of blowers, manual scrubbing, and biocides.
- d.) Building materials that cannot be dried and fully cleaned are removed using methods intended to minimize occupant exposure to high concentrations of spores. Removal often involves activities typical of the construction industry. Some situations will require extra precautions similar to those used for handling asbestos- or lead-containing materials to limit the distribution of airborne mold spores.
- e.) Use special care when removing materials that are still damp. Wet materials will be heavier than when dry. Additionally, after a flood, wet materials might be contaminated with any other hazardous substance present in floodwaters.

2.5 Standards of Quality (Quality Control)

2.5.1 Quality Assurance, the Contractor shall:

- a) Submit copies of inspection reports, notices and similar documents to the designated HCC representative (where applicable).
- b) Handle and store materials in strict accordance with manufacturer's instructions.
- c) Submit all pertinent information to the designated HCC representative regarding any Subcontractor for approval prior to using any Subcontractor for the first time at HCC.
- d) All normal precautions associated with pressure washing must also be taken to protect the safety of the building, its occupants and the Contractor's staff.

2.5.2 Regulations

The purpose of this guidance is to provide users with an understanding of the basic quality assurance (QA) and quality control (QC) procedures that may be used in planning, implementing, and assessing the design, construction, and operation of environmental technologies, an all-inclusive term used to describe pollution control devices and systems, waste treatment processes and storage facilities, and site remediation technologies and their components that may be utilized to remove pollutants or contaminants from or prevent them from entering the environment. This guidance is intended to complement the requirements defined in the American National Standard Specifications and Guidelines for Quality Systems for Environmental Data Collection and Environmental Technology Programs (ANSI/ASQC E4- 1994) (ANSI/ASQC, 1994) by (1) providing basic guidance on applicable QA and QC

practices; (2) outlining engineering planning, construction, and operation processes that may require QA and QC elements; and (3) identifying resources and references that may be utilized by environmental professionals during the design, construction, and operation of environmental technologies.

This document is not a manual on engineering design, construction, or operation. Rather, it is intended to be a guide for technical project managers and QA staff in environmental programs to help them to better understand when and how QA and QC practices should be applied to engineering work. That is, it is a resource for users to help them understand the range and scope of QA and QC practices in support of environmental technologies. Accordingly, while this guidance is not written exclusively for engineers, it does use highly technical terminology and may be used by managers with non-engineering backgrounds. As a further aid, the guidance uses and refers to good engineering principles/practices (GEPs) when discussing the application of QA and QC during a project. There are many other texts and manuals in the literature that can provide more details on the subjects discussed in this guidance.

Moreover, this document is non-mandatory guidance and all parts of the document may be used with discretion. It is not intended to imply any requirements for the use of environmental technology. Such requirements are defined by appropriate environmental statute or regulation, or as part of an applicable extramural agreement (e.g., contract, assistance agreement) or enforcement agreement, order, or other enforceable document.

14. Small Business Development Program (SBDP):

The Houston Community College System's Small Business Development Program ("SBDP" or the "Program") was created to provide business opportunities for local small businesses to participate in contracting and procurement at Houston Community College (HCC).

The SBDP is a goal-oriented program, requiring Contractors who receive Contracts from HCC to use Good Faith Efforts to utilize certified small businesses. The Program applies to all Contracts over \$50,000, except Contracts for sole-source items, federally funded Contracts, Contracts with other governmental entities, and those Contracts that are otherwise prohibited by applicable law or expressly exempted by HCC. The SBDP is a race and gender-neutral program, however HCC actively encourages the participation of minority and women-owned small businesses in the SBDP.

To participate, small businesses must be certified by an agency or organization whose certification is recognized by HCC. Certification is based on the firm's gross revenues or number of employees averaged over the past three years, inclusive of any affiliates as defined by 13 C.F.R. § 121.103, does not exceed the size standards as defined pursuant to Section 3 of the Small Business Act and 13 C.F.R. § 121.201.

HCC recognizes certification by the following governmental and private agencies: Metropolitan Transit Authority of Harris County (METRO) SBE Certification, City of Houston SBE, MWPDBE and DBE Certifications, Texas Department of Transportation SBE Certification, City of Austin SBE Certification, South Central Texas Regional Certification Agency SBE Certification, Small Business Administration 8(a). HCC has the right to revoke acceptance of a business as a certified or qualifying small business and to conduct certification reviews. For more information regarding SBE Certifications go to: <http://www.hccs.edu/about-hcc/procurement/small-business-procurement/>.

Good Faith Efforts: HCC will make a good faith effort to utilize small businesses in all contracts. The annual program goals may be met by contracting directly with small businesses or indirectly through subcontracting opportunities. Therefore, any business that contracts with HCC will be required to make a good faith effort to award subcontracts to small businesses. The subcontracting goal applies to all vendors regardless of their status. By implementing the following procedures, a contractor shall be presumed to have made a good faith effort:

- a. To the extent consistent with industry practices, divide the contract work into reasonable lots.
- b. Give notice to SBDP eligible firms of subcontract opportunities or post notices of such opportunities in newspapers and other circulars.
- c. Document reasons for rejecting a firm that bids on subcontracting opportunities.

- b. Certified small business prime contractor that meets the SBE Bonus Points subcontracting commitment using a certified small business subcontractor – automatically eligible for maximum available SBE Bonus Points.
